KPI summary

Q3 2026 vs Q2 2026 · Region: APAC

KPI scorecard: Q3 2026 vs Q2 2026

KPI	Q3 2026	Q2 2026	Change	Direction
Exception rate	0.83%	0.50%	+0.34 pp	Worse
On-time completion %	95.6%	97.2%	-1.58 pp	Worse
Exceptions	27,509	17,836	+9,673	Worse
High-severity exceptions	7,088	2,992	+4,096	Worse
Open exceptions (Sep 2026)	2,254	56	+2,198	Worse
Remediation closure rate	84.0%	99.0%	-14.94 pp	Worse
Operational loss	₹16.90 cr	₹9.45 cr	₹7.45 cr	Worse
Data quality completeness	100.0%	100.0%	+0.00 pp	Flat

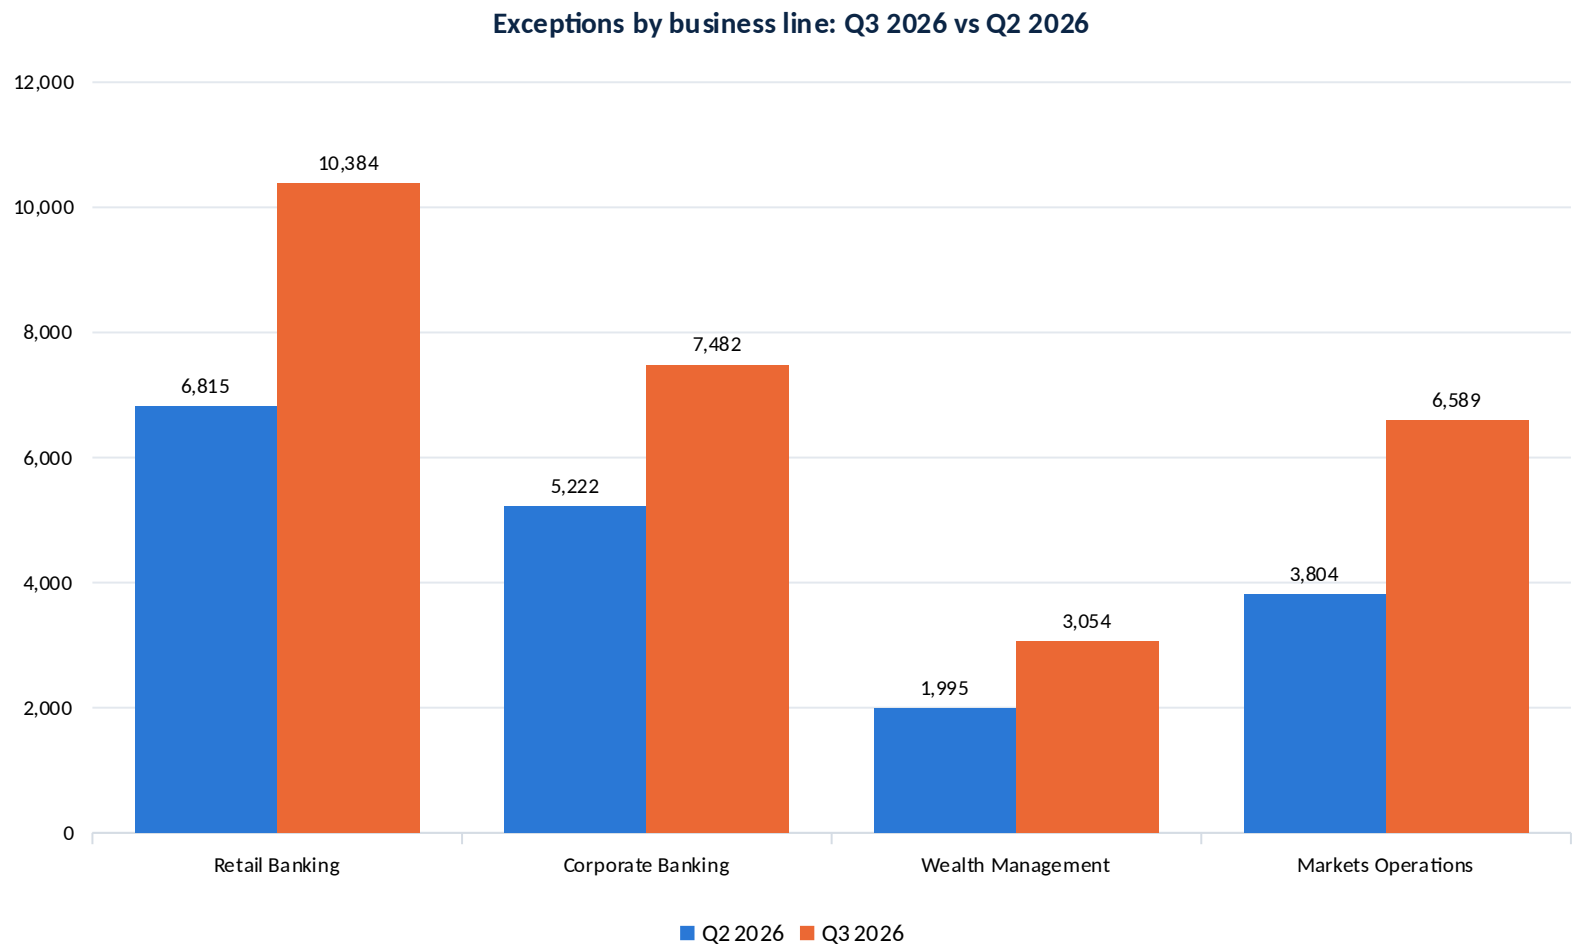

Management commentary (draft)

- Exception rate rose from 0.50% to 0.83% (+0.34 pp).
- High-severity exceptions: 7,088 (+4,096 vs Q2 2026).
- Closure rate 84.0%; 2,254 exceptions open at Sep 2026.
- Month-over-month exception rate movement into Sep 2026: -0.43 pp.

Synthetic dataset ops-v1-173a1e (data to Sep 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month.

Q3 2026 vs Q2 2026 by business line

Region: APAC

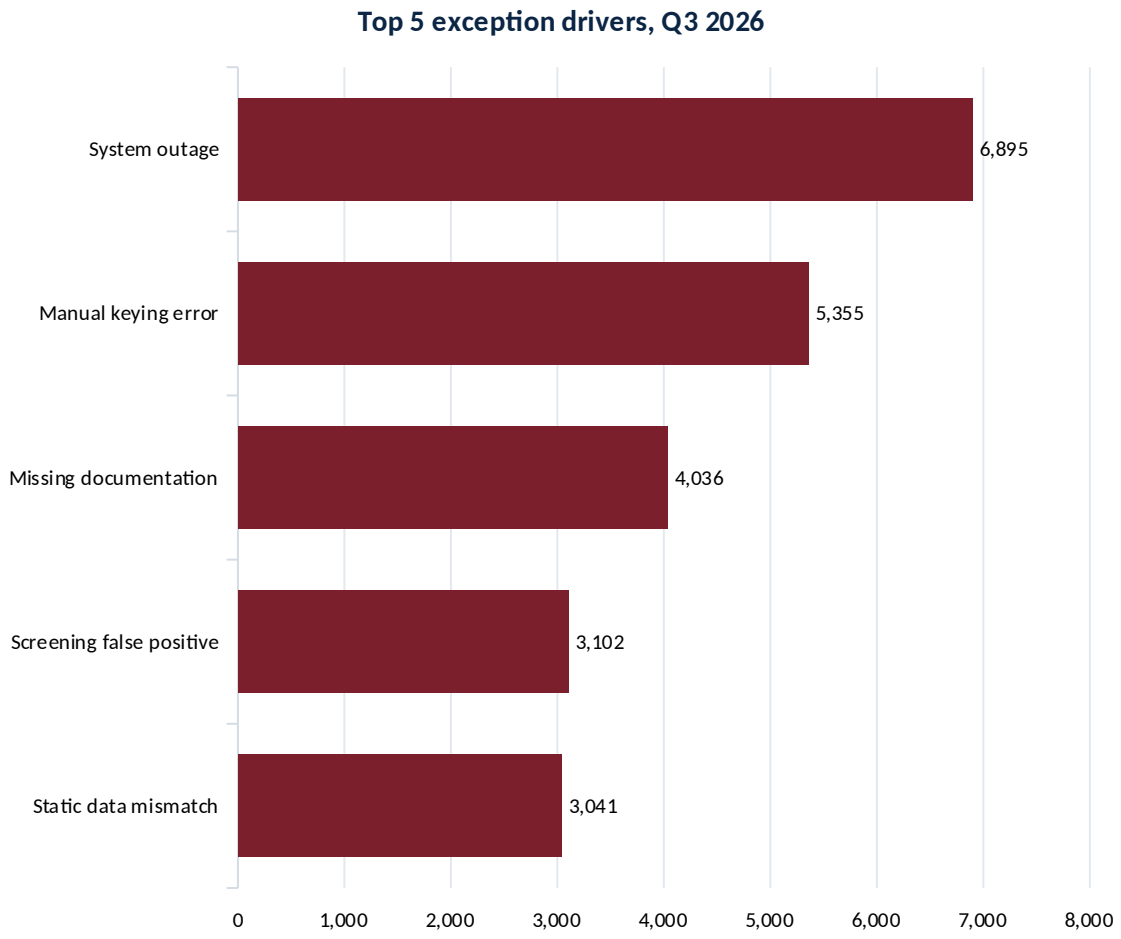

Management commentary (draft)

- Retail Banking moved most: 6,815 → 10,384 (+3,569).
- Retail Banking has the most exceptions in Q3 2026 (10,384, 38% of total).

Synthetic dataset ops-v1-173a1e (data to Sep 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month.

Top 5 exception drivers

Ranked by exceptions · Q3 2026 · Region: APAC

Ranked drivers

#	Root cause	Exceptions	Share	vs Q2 2026
1	System outage	6,895	25%	+5,499
2	Manual keying error	5,355	19%	+1,589
3	Missing documentation	4,036	15%	+1,956
4	Screening false positive	3,102	11%	+1,215
5	Static data mismatch	3,041	11%	-193

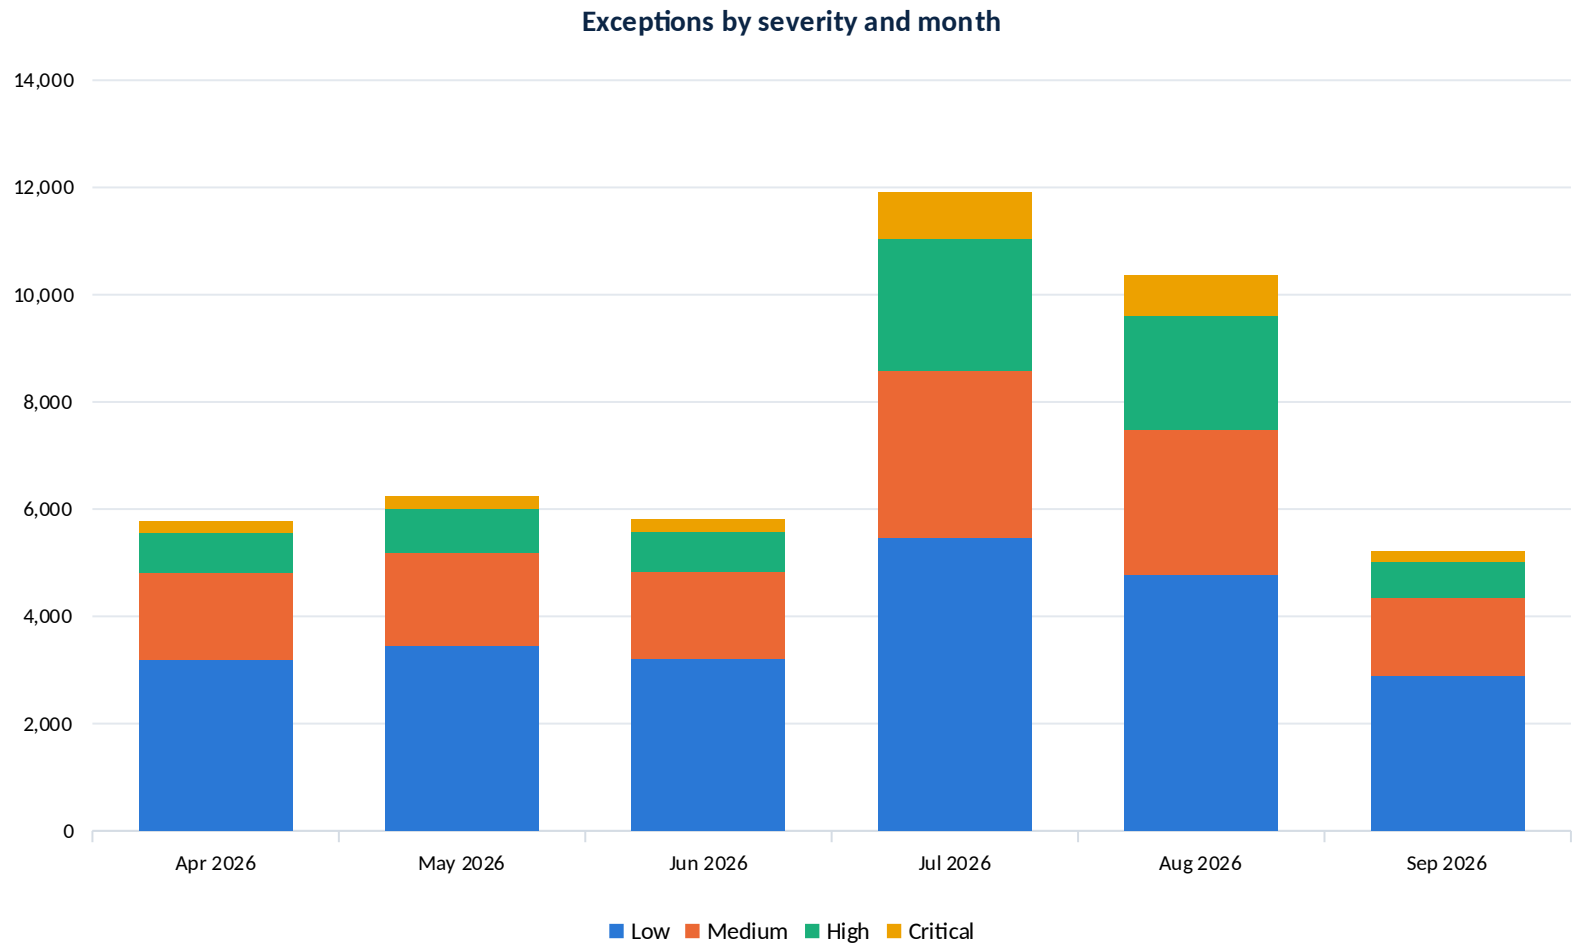

Management commentary (draft)

- System outage: 6,895 exceptions (25% of total), +5,499 vs Q2 2026.
- Manual keying error: 5,355 exceptions (19% of total), +1,589 vs Q2 2026.
- Missing documentation: 4,036 exceptions (15% of total), +1,956 vs Q2 2026.
- *Hypothesis: Root cause is the category recorded by control owners; it ranks where exceptions were logged, not a proven causal explanation.*

Synthetic dataset ops-v1-173a1e (data to Sep 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month.

Severity mix

Region: APAC

Management commentary (draft)

- High + Critical are 25.8% of exceptions in Q3 2026 (7,088 of 27,509).
- That compares with 2,992 in Q2 2026.

Synthetic dataset ops-v1-173a1e (data to Sep 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month.

Management commentary

Q3 2026 vs Q2 2026 · Region: APAC

Management commentary (draft)

- Exception rate rose from 0.50% to 0.83% (+0.34 pp).
- High-severity exceptions: 7,088 (+4,096 vs Q2 2026).
- System outage: 6,895 exceptions (25% of total), +5,499 vs Q2 2026.
- Manual keying error: 5,355 exceptions (19% of total), +1,589 vs Q2 2026.
- *Caveat: 7 source rows were quarantined at validation and are excluded from every figure.*
- *Caveat: Data warning: Category spelling normalised (1). e.g. 'Apac' -> 'APAC'*

Synthetic dataset ops-v1-173a1e (data to Sep 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month. Draft generated from computed metrics; requires human review before distribution.
