KPI summary

Jul–Oct 2026 vs Q2 2026 · Region: EMEA

KPI scorecard: Jul–Oct 2026 vs Q2 2026

KPI	Jul–Oct 2026	Q2 2026	Change	Direction
Exception rate	0.49%	0.49%	+0.00 pp	Flat
On-time completion %	97.2%	97.2%	-0.01 pp	Flat
Exceptions	24,760	20,428	+4,332	Worse
High-severity exceptions	4,161	3,437	+724	Worse
Open exceptions (Oct 2026)	2,409	152	+2,257	Worse
Remediation closure rate	71.0%	98.2%	-27.23 pp	Worse
Operational loss	₹15.70 cr	₹8.98 cr	₹6.72 cr	Worse
Data quality completeness	100.0%	100.0%	+0.00 pp	Flat

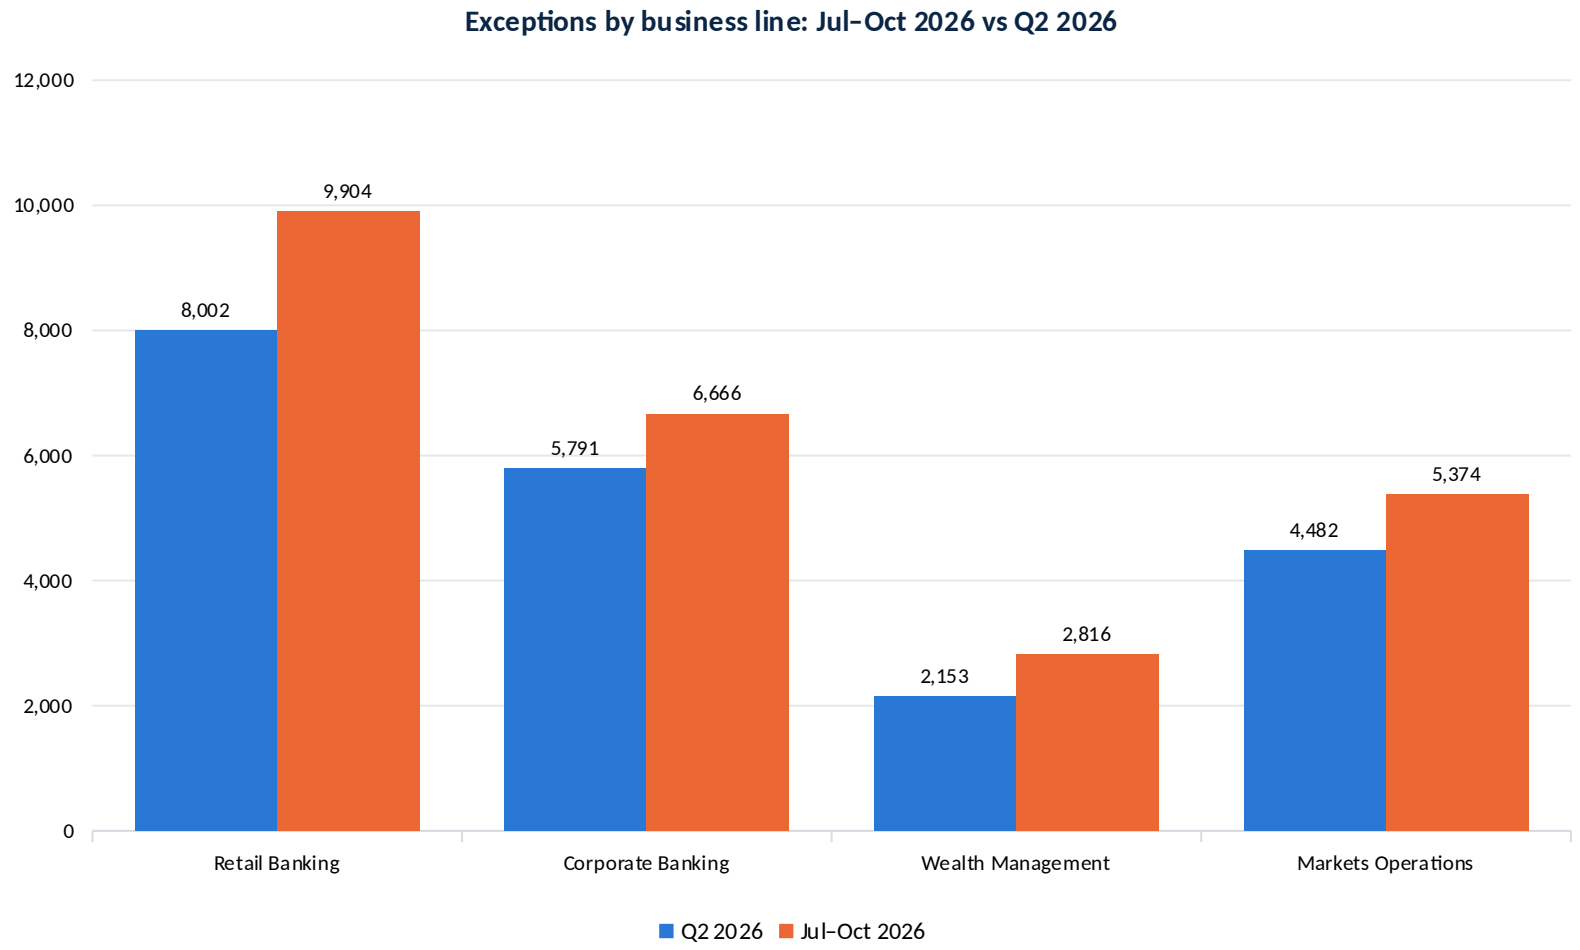

Management commentary

- Exception rate was broadly flat moving from 0.49% to 0.49% (+0.00 pp).
- High-severity exceptions: 4,161 (+724 vs Q2 2026).
- Closure rate 71.0%; 2,409 exceptions open at Oct 2026.
- Month-over-month exception rate movement into Oct 2026: -0.04 pp.

Synthetic dataset ops-v2-e3e947 (data to Oct 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month.

Jul–Oct 2026 vs Q2 2026 by business line

Region: EMEA

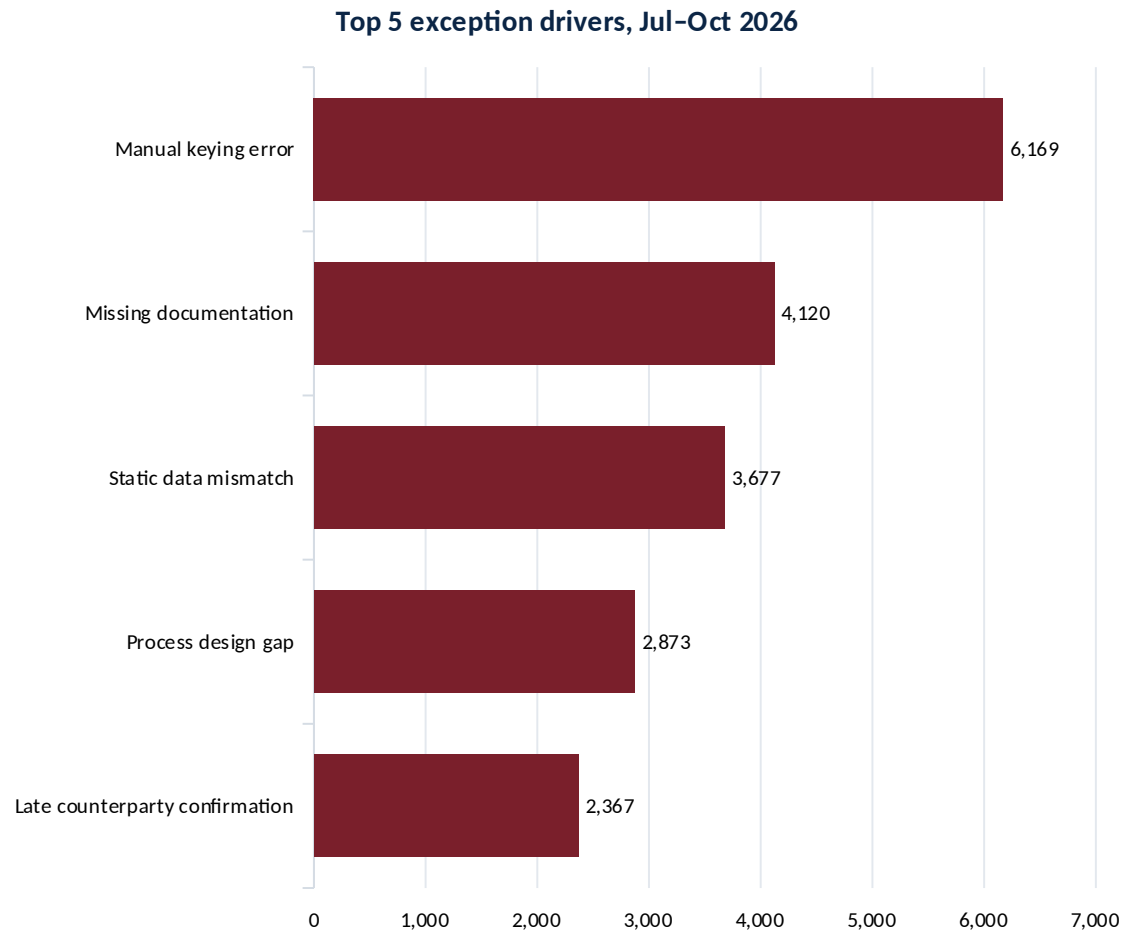

Management commentary

- Retail Banking moved most: 8,002 → 9,904 (+1,902).
- Retail Banking has the most exceptions in Jul–Oct 2026 (9,904, 40% of total).

Synthetic dataset ops-v2-e3e947 (data to Oct 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month.

Top 5 exception drivers

Ranked by exceptions · Jul–Oct 2026 · Region: EMEA

Ranked drivers

#	Root cause	Exceptions	Share	vs Q2 2026
1	Manual keying error	6,169	25%	+2,542
2	Missing documentation	4,120	17%	+696
3	Static data mismatch	3,677	15%	+731
4	Process design gap	2,873	12%	+1,047
5	Late counterparty confirmation	2,367	10%	-776

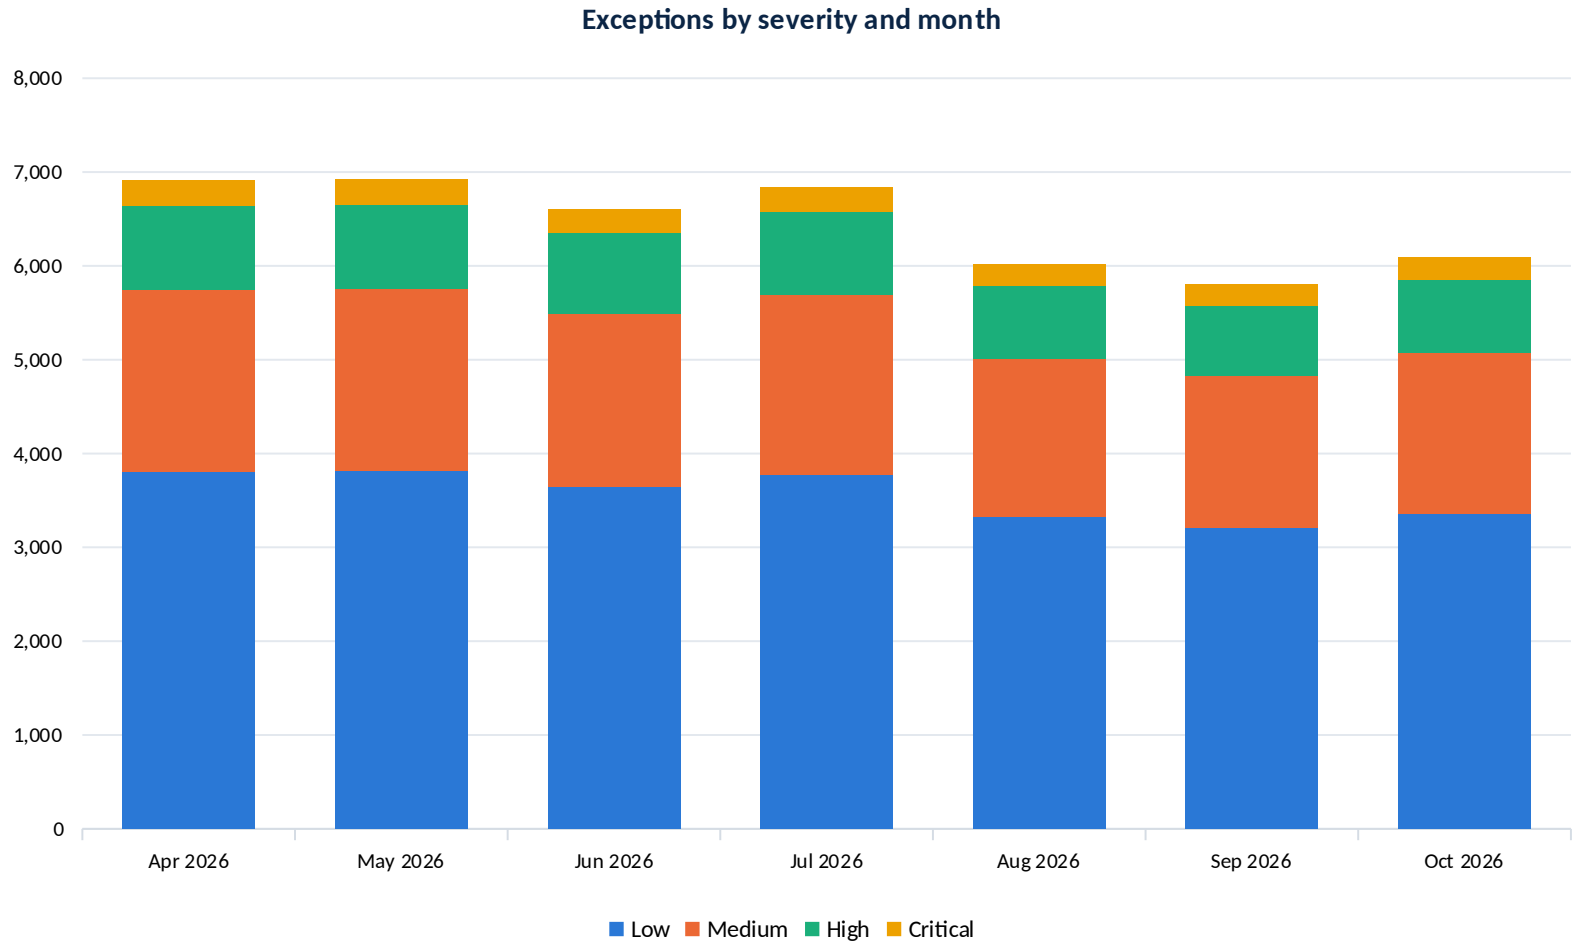

Management commentary

- Manual keying error: 6,169 exceptions (25% of total), +2,542 vs Q2 2026.
- Missing documentation: 4,120 exceptions (17% of total), +696 vs Q2 2026.
- Static data mismatch: 3,677 exceptions (15% of total), +731 vs Q2 2026.
- *Hypothesis: Root cause is the category recorded by control owners; it ranks where exceptions were logged, not a proven causal explanation.*

Synthetic dataset ops-v2-e3e947 (data to Oct 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month.

Severity mix

Region: EMEA

Management commentary

- High + Critical are 16.8% of exceptions in Jul–Oct 2026 (4,161 of 24,760).
- That compares with 3,437 in Q2 2026.

Synthetic dataset ops-v2-e3e947 (data to Oct 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month.

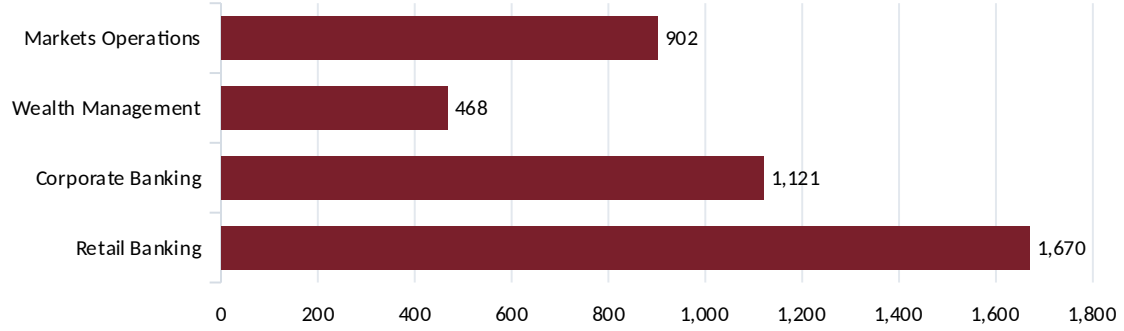

High-severity exceptions

High and Critical only · Jul–Oct 2026 · Region: EMEA

Largest High/Critical clusters, Jul–Oct 2026

Region	Business line	Process	Root cause	Exc.	Loss	Max age (d)	Open
EMEA	Retail Banking	Payments	Manual keying error	216	₹47.4 lakh	64	No
EMEA	Retail Banking	Payments	Missing documentation	204	₹48.6 lakh	202	Yes
EMEA	Retail Banking	Payments	Static data mismatch	175	₹59.3 lakh	53	No
EMEA	Corporate Banking	Payments	Manual keying error	149	₹20.2 lakh	98	Yes
EMEA	Markets Operations	Payments	Manual keying error	127	₹35.4 lakh	110	Yes

High/Critical exceptions by business line

Management commentary

- Largest cluster: EMEA Retail Banking Payments, 'Manual keying error', 216 High/Critical exceptions.
- 4,161 High/Critical exceptions in total; ₹15.70 cr of losses booked against them.

Synthetic dataset ops-v2-e3e947 (data to Oct 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month.

Management commentary

Jul–Oct 2026 vs Q2 2026 · Region: EMEA

Management commentary

- *EMEA exception rate remains elevated; owners confirm drivers by 15 Nov.*
- *Settlement backlog is the main watch item.*

Synthetic dataset ops-v2-e3e947 (data to Oct 2026). Exception rate = exceptions / transaction volume de-duplicated per process-month. Draft generated from computed metrics; requires human review before distribution.
