Technology Workforce Review (full pack) — FY 2018

FY 2018 · All data · Headcount data as of 30 Sep 2018

Generated 2026-10-31 07:24 UTC by Prompt-to-Presentation AI · D-0002 v1

142

people on contract today

as of 30 Sep 2018

-61%

FTE since Jan-18

199 to 78 FTE by Dec-18

98

contracts end on 31 Dec 2018

people on contract with that end date

The short version

Four things worth knowing before we go into the detail

We've shrunk by 61% since Jan-18

FTE went from about 199 to 78. The largest monthly fall was -73 FTE into Apr-18.

Pune carried 69% of the change

FTE by location: Pune 94→11, Bangalore 20→0, Singapore 84→67.

Two vendors supply 49% of external people

Wyvern Consulting and Dunmore Tech provide 36 of our 73 external people on contract. That is concentration risk at renewal.

98 contracts end on 31 Dec 2018

They roll off on the same day unless we act. A renew, convert or release plan is needed before then.

Source: synthetic roster workforce_roster_synthetic.csv (wf-v1-696999), duplicates counted once. 'On contract' = start date on or before the as-of date and end date on or after it.

People on contract: location x resource type

External people by vendor (Pareto)

Cum. share: Wyvern Consulting 29%, Dunmore Tech 49%, Shellcrest Partners 68%, Northwind Staffing 82%, Starling IT 90%, Mackinley Infotech 96%, Crownfield 99%, Morrow Systems 100%

Management commentary (draft)

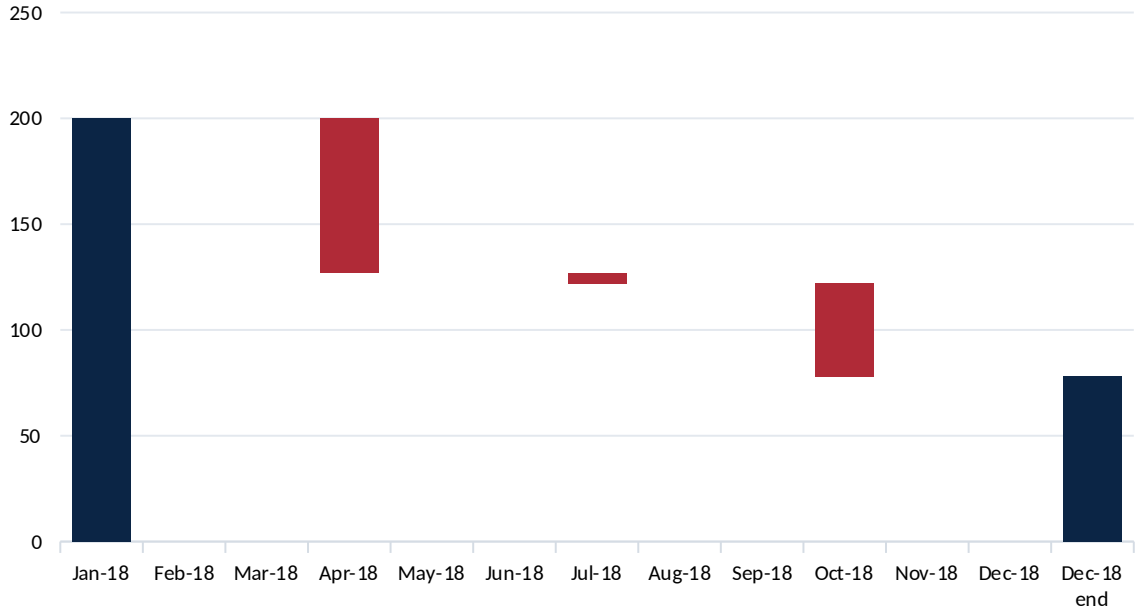

- 142 people on contract on 30 Sep 2018; 54 T&M, 69 internal, 19 fixed price.
- Monthly run-rate €484k in Sep-18 against a peak of €735k in Feb-18.
- Top two vendors supply 36 of 73 external people (49%).

Source: synthetic roster workforce_roster_synthetic.csv (wf-v1-696999), duplicates counted once. Pareto: cum. = cumulative share of external people on contract.

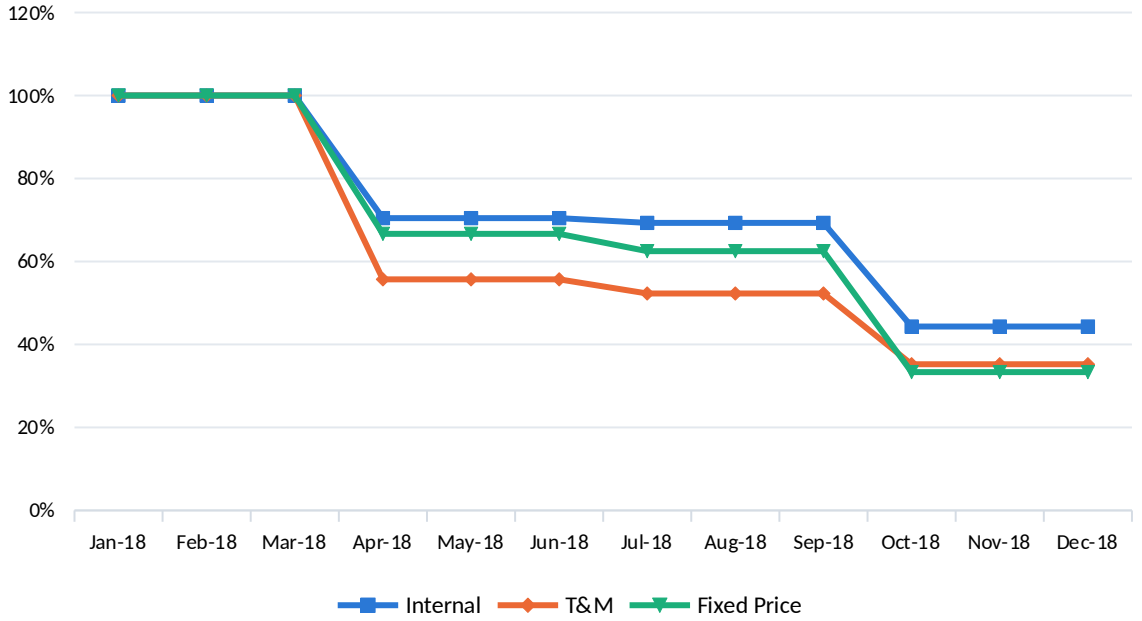

How we got here: a headcount bridge

Monthly joiners and leavers, and who stayed

People allocated: month-by-month walk

Retention by resource type (Jan-18 cohort)

Management commentary (draft)

- People allocated went from 200 in Jan-18 to 78 in Dec-18; the biggest single move was -73 in Apr-18.
- Of the Jan-18 team, 44% of Internal, 35% of T&M, 33% of Fixed Price are still allocated in Dec-18.

Source: synthetic roster workforce_roster_synthetic.csv (wf-v1-696999), duplicates counted once. A person counts in a month if allocation > 0. Retention = share of the base-month team still allocated. Months after the roster date (30 Sep 2018): Oct-18 to Dec-18 are planned allocations, not actuals.

Where the change landed: FTE by location

Same scale for every location

-100%

Bangalore FTE, Jan-18 to Dec-18

20 to 0 FTE

-88%

Pune FTE, Jan-18 to Dec-18

94 to 11 FTE

-21%

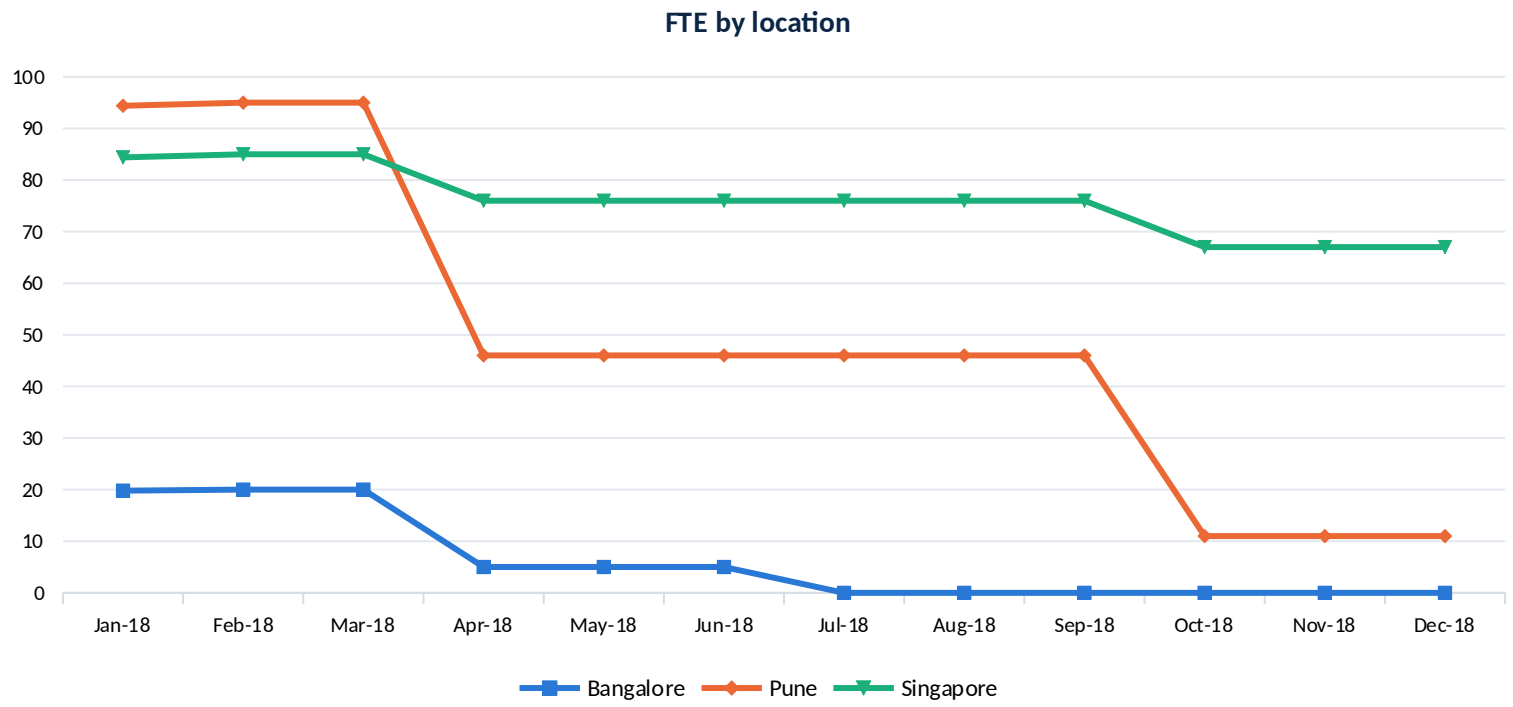

Singapore FTE, Jan-18 to Dec-18

84 to 67 FTE

€167 → €190

Average daily rate (FTE-weighted)

lower-rate capacity leaving raises the average

Management commentary (draft)

- Bangalore FTE went from 20 to 0 (-100%).
- Pune FTE went from 94 to 11 (-88%).
- Singapore FTE went from 84 to 67 (-21%).
- FTE-weighted average daily rate moved from €167 to €190.
- *Hypothesis: Where a location loses most of its team, knowledge of critical systems may now sit elsewhere; this is a hypothesis to test with line managers.*

Source: synthetic roster workforce_roster_synthetic.csv (wf-v1-696999), duplicates counted once. FTE = sum of monthly allocations. Months after the roster date (30 Sep 2018): Oct-18 to Dec-18 are planned allocations, not actuals.

Month by month: where the FTE sat

Darker cells = more FTE; blank = no allocation

FTE by location, resource type and month

Location · type	Jan-18	Feb-18	Mar-18	Apr-18	May-18	Jun-18	Jul-18	Aug-18	Sep-18	Oct-18	Nov-18	Dec-18
Bangalore · Fixed Price	3.0	3.0	3.0	1.0	1.0	1.0						
Bangalore · Internal	7.9	8.0	8.0	1.0	1.0	1.0						
Bangalore · T&M	8.9	9.0	9.0	3.0	3.0	3.0						
Pune · Fixed Price	14.9	15.0	15.0	9.0	9.0	9.0	9.0	9.0	9.0	2.0	2.0	2.0
Pune · Internal	33.7	34.0	34.0	20.0	20.0	20.0	20.0	20.0	20.0	4.0	4.0	4.0
Pune · T&M	45.7	46.0	46.0	17.0	17.0	17.0	17.0	17.0	17.0	5.0	5.0	5.0
Singapore · Fixed Price	6.0	6.0	6.0	6.0	6.0	6.0	6.0	6.0	6.0	6.0	6.0	6.0
Singapore · Internal	45.6	46.0	46.0	41.0	41.0	41.0	41.0	41.0	41.0	35.0	35.0	35.0
Singapore · T&M	32.8	33.0	33.0	29.0	29.0	29.0	29.0	29.0	29.0	26.0	26.0	26.0

Management commentary (draft)

- Pune T&M was the largest block at 46 FTE and is 5 FTE in Dec-18.
- Singapore Fixed Price was the most stable row (range 0.0 FTE).

Source: synthetic roster workforce_roster_synthetic.csv (wf-v1-696999), duplicates counted once. Months after the roster date (30 Sep 2018): Oct-18 to Dec-18 are planned allocations, not actuals.

What the change did to cost

Monthly run-rate Jan-18 to Dec-18, by location and resource type

-55%

monthly run-rate

€730k in Jan-18, €326k in Dec-18

-€271k

change each month in Pune

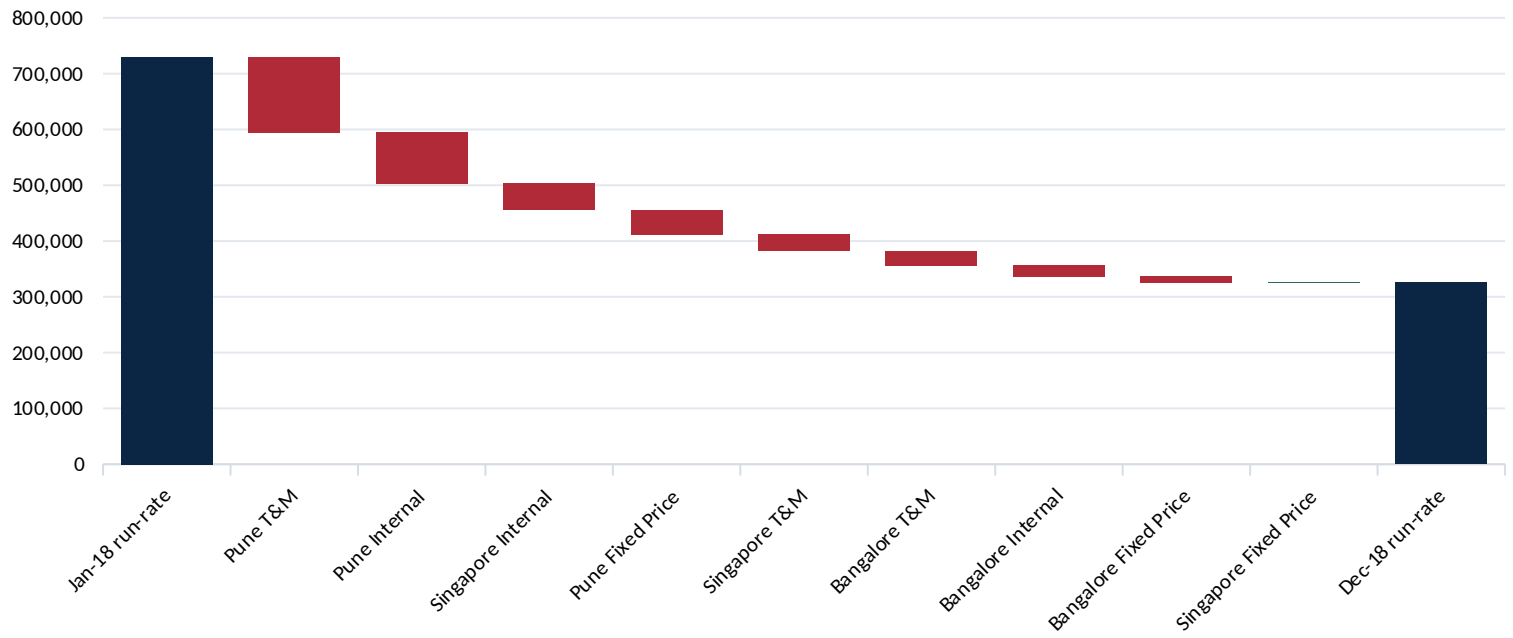

T&M -€136k, Internal -€92k, Fixed Price -€44k

€2.47m

T&M cost, FY 2018

96 contractors, 22 days a month

Monthly cost run-rate bridge, Jan-18 to Dec-18 (EUR)

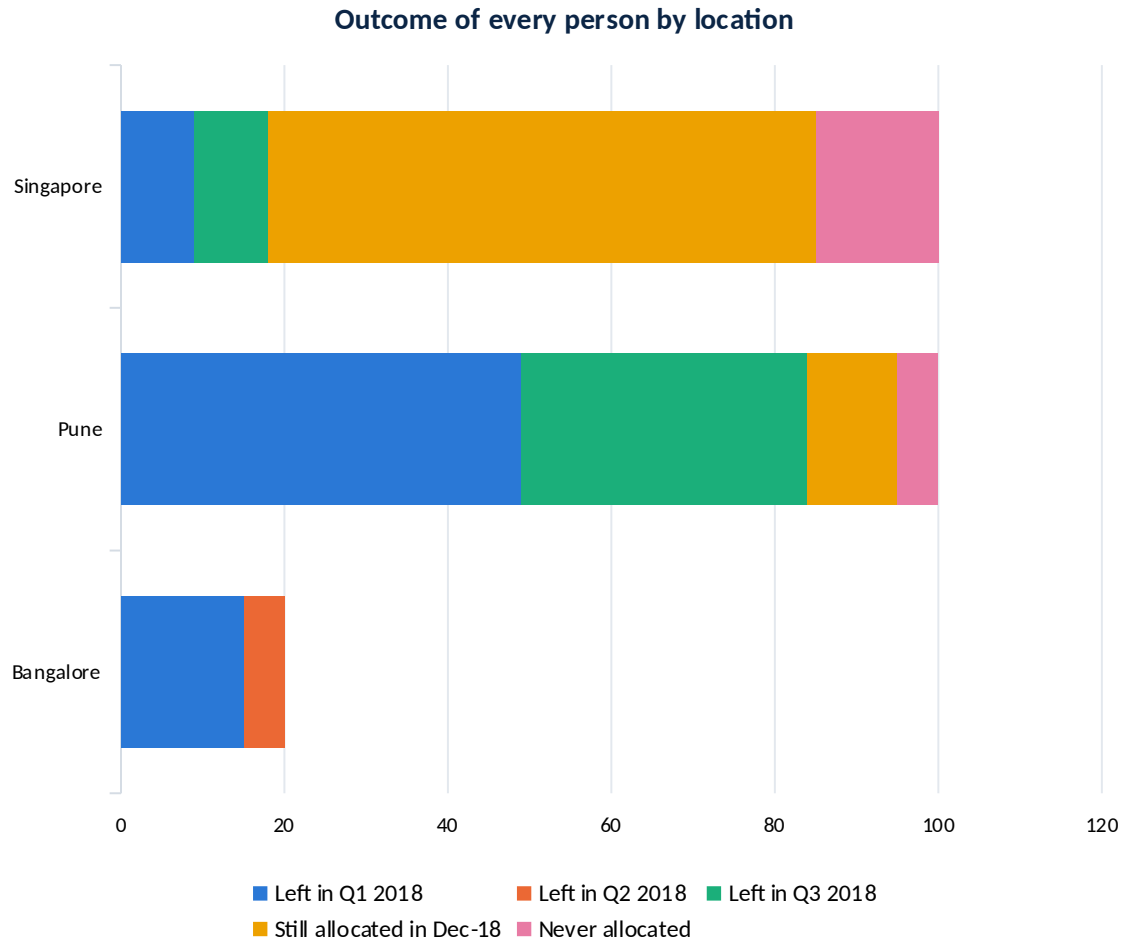

Management commentary (draft)

- Monthly run-rate moved from €730k to €326k (-55%).
- T&M cost over FY 2018 was €2.47m (EUR 2,466,412.91).
- Pune accounts for 67% of the run-rate change.

Source: synthetic roster workforce_roster_synthetic.csv (wf-v1-696999), duplicates counted once. Run-rate = monthly FTE x 22 working days x daily rate (EUR); no FX, tax or vendor mark-up. Months after the roster date (30 Sep 2018): Oct-18 to Dec-18 are planned allocations, not actuals.

Where everyone ended up

Following all 220 people in scope from location and resource type to outcome

Outcome x resource type (people)

Outcome	Internal	T&M	Fixed Price	Total
Left in Q1 2018	26	39	8	73
Left in Q2 2018	1	3	1	5
Left in Q3 2018	22	15	7	44
Still allocated in Dec-18	39	31	8	78
Never allocated	8	8	4	20

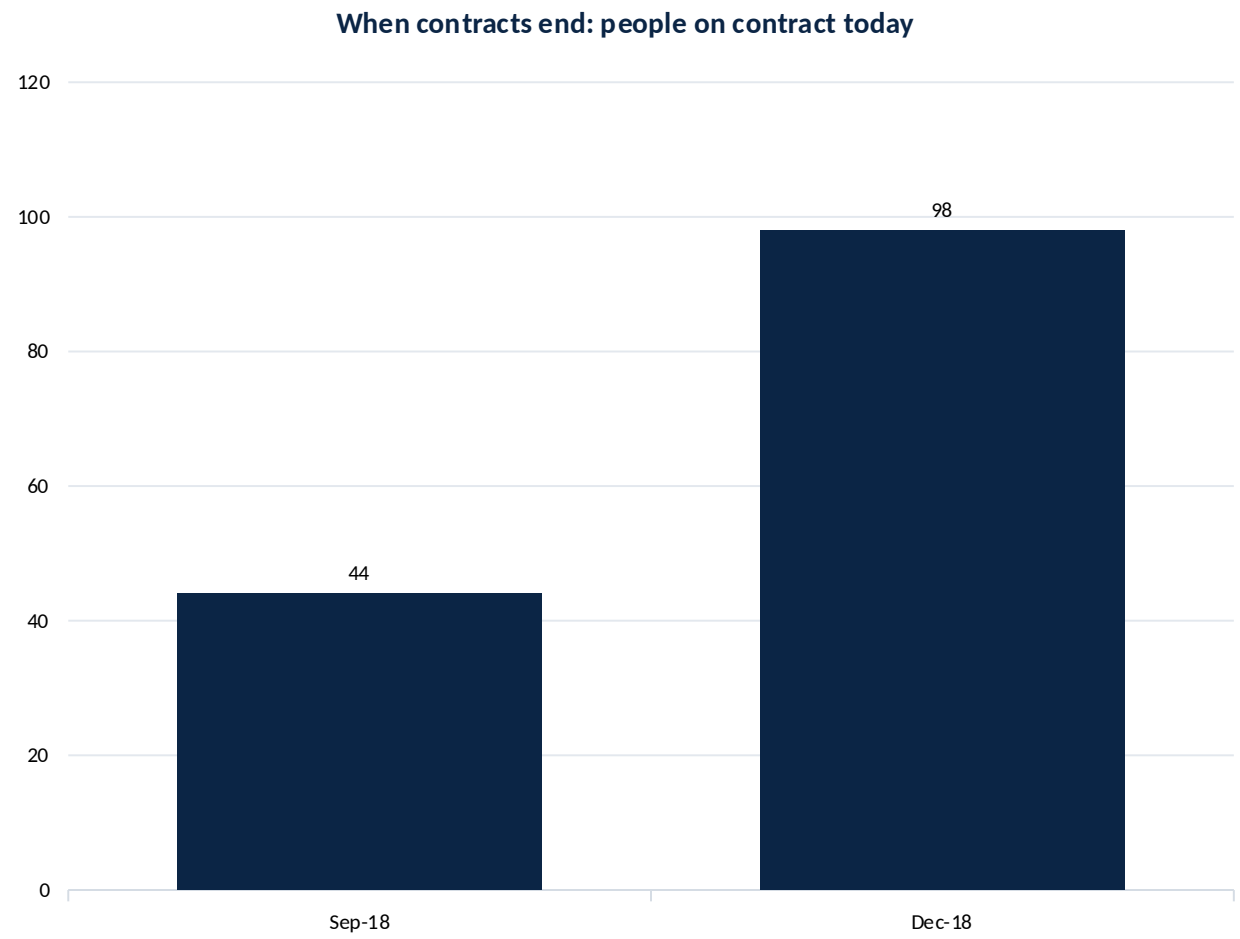

Management commentary (draft)

- Left in Q1 2018: 73 of 220 people (33%).
- Left in Q2 2018: 5 of 220 people (2%).
- Left in Q3 2018: 44 of 220 people (20%).
- Still allocated in Dec-18: 78 of 220 people (35%).
- Never allocated: 20 of 220 people (9%).

Source: synthetic roster workforce_roster_synthetic.csv (wf-v1-696999), duplicates counted once. 'Never allocated' = contract dates set but every monthly allocation is zero. Native stacked bar used instead of a Sankey so the chart stays editable.

A big decision is due

Contract end dates for everyone on contract today

Renew

Keep the people who run critical systems; use the renewal to renegotiate rates with the top vendors (Wyvern Consulting, Dunmore Tech).

Convert

54 T&M contractors have been with us 6+ months; convert where the role is permanent (cost case to be confirmed).

Release

Let roles go where the project has ended, starting with the 20 people on contract with zero allocation.

Management commentary (draft)

- 98 of 142 people on contract end on 31 Dec 2018.
- 20 people on contract show zero allocation in every month: either not working on these projects or the tracker is out of date.
- *Hypothesis: Renew / convert / release options are proposals for management decision, not conclusions from the data.*

Source: synthetic roster workforce_roster_synthetic.csv (wf-v1-696999), duplicates counted once. Zero-allocation check uses the monthly allocation columns.

What I'd suggest we do next

Four steps, in order

1

Clean the data

Confirm the 20 zero-allocation contracts and fix the 1 duplicate record(s), so we decide on facts.

By 15 Nov 2018

2

Decide on the 98

Sort every 31 Dec 2018 contract into renew, convert or release with the line managers.

By 30 Nov 2018

3

Renegotiate with vendors

Use the renewals to agree better rates with Wyvern Consulting, Dunmore Tech and test one new supplier.

By 15 Dec 2018

4

Protect critical capability

Agree the minimum team each location needs before any further reduction.

Q1 2019 plan

Management commentary (draft)

- *Hypothesis: Next steps are proposals for management decision; dates are counted back from the contract end date 31 Dec 2018.*

Source: synthetic roster workforce_roster_synthetic.csv (wf-v1-696999), duplicates counted once.

Appendix: how the numbers were worked out

Assumptions, definitions and data lineage

The data

workforce_roster_synthetic.csv (wf-v1-696999); 220 unique people in scope; duplicates counted once; 0 rows quarantined. 'On contract' = start date on or before 30 Sep 2018 and end date on or after it.

Cost and FTE

Monthly columns are FTE allocations, so part months are pro-rated. Cost = FTE x 22 working days x daily rate in EUR (rate card: Band_11 €200, Band_9 €100 where no rate is given). No FX, tax or vendor mark-up.

Provenance

Filters: All data. Period: FY 2018. Queries: 4ca99d0143e896b8, 5a3656a92e89e7c9. Commentary is generated from computed numbers and is labelled draft until a reviewer approves it.
